Allowable Subject Matter

Claims 51-59, 61-68 are allowed.

The following is an examiner's statement of reasons for allowance: the prior does not teach a compressed tablet comprising efavirenz and croscarmellose wherein the efavirenz is about 50% by weight and croscarmellose is about 1% to about 5% by weight of the total composition of the tablet. As provided by the declarations filed on October 6, 2003 and August 6, 2005 the instantly claimed tablets show an unexpected and improved bioavailability over the tablets and capsules of the closest prior art Makooi US Patent 6,238,695. According to the declaration filed on October 6, 2003 efavirnez tablets containing 5wt% or less of croscarmellose would have an improved bioavailability over the comparable tablets containing more than 10% wt croscarmellose and the same or better bioavailability of capsules containing more than 10% wt croscarmellose. Such degree of bioavailability is unexpected in efavirenz tablets having a 5% wt or lower concentrations of croscarmellose, because as described in paragraph 9-13 of the declaration, decreasing the concentrations of croscarmellose in tablets would have decreased the bioavailability and the Area Under the Curve. Thus, the ordinary skill in the art would not have expected to observe an improvement of bioavailability by lowering the concentrations of croscarmellose.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
